PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience designing and developing scalable web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js). Proficient in JavaScript, RESTful APIs, Authentication & Authorization, Database Design, Responsive Web Development, and Software Engineering principles. Experienced in building secure, performance-optimized applications with modern development tools including Git, GitHub, Postman, Prisma ORM, and Tailwind CSS. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and Agile Development. Passionate about solving real-world problems through technology and continuous learning.

EDUCATION

Bachelor of Computer Application (BCA)	June 2023 – June 2026
Anjuman Institute Of Management and Computer Application	Karnataka, India
Relevant Coursework	
Data Structures & Algorithms , Database Management Systems (DBMS), Operating Systems , Computer Networks , Software Engineering	

WORK EXPERIENCE

Technical Operations Support (Part-Time)	July 2025 – August 2025
INF NGO	Karnataka, India
Provided technical support during NGO exhibitions and events, ensuring smooth operations through troubleshooting, system setup, and real-time assistance.	
- Resolved 20+ technical issues during live events. - Supported 500+ attendees with technical assistance. - Assisted in system setup, software configuration, and event operations. - Collaborated with teams to ensure uninterrupted event execution.	

SKILLS

Technical Skills
Languages: Python, Java, C, C++, JavaScript (ES6+)
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design, React Router, API Integration
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Authentication & Authorization, MVC Architecture
Database: MongoDB, MySQL, Prisma ORM, Database Design
Tools & Platforms: Git, GitHub, Postman, Firebase, Vite, VS Code, JSON, NPM, API Testing, Deployment, CI/CD, Git Workflow
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, SDLC, Agile Methodology, Database Design
Cloud & AI: Google Cloud Platform (GCP), Generative AI, Large Language Models (LLMs), Prompt Engineering

CERTIFICATIONS

- Google Cloud – Introduction to Generative AI
- Google Cloud – Introduction to Large Language Models
- Google Cloud – Responsible AI
- Google Cloud – Prompt Design in Vertex AI
- Git, GitHub & Markdown Crash Course (Udemy)
- Simplilearn – Advanced Search Engine Optimization Certification Program

LEADERSHIP & ACHIEVEMENTS

- **Class Representative (3rd Year)** – Coordinated communication between students and faculty while representing academic concerns.
- **Event Coordinator** – Organized and supported technical and non-technical college events.
- **College Fest Organizer** – Participated in planning and execution of academic and cultural events.
- Demonstrated strong leadership, collaboration, communication, and coordination skills.
- Solved 200+ coding problems on various coding platforms.
- Google Cloud Generative AI Certified.
- Successfully developed multiple full-stack web applications using MERN Stack.

PROJECTS

LearnChart – Full Stack Learning Management System

- Developed a full-stack Learning Management System using React.js, Node.js, Express.js, MongoDB, and Prisma ORM.
- Implemented JWT-based Authentication and Authorization.
- Designed scalable database schemas and optimized MongoDB queries, reducing API response time by 30%.
- Built responsive dashboards and course management features.
- Supported 100+ concurrent users with secure access control.
- Developed and consumed RESTful APIs for seamless frontend-backend communication.

GitHub: <https://github.com/fahaman/LearnChart>

HelpHive – Community Support & Service Marketplace Platform

- Built a MERN-based marketplace platform connecting users with trusted service providers.
- Developed secure REST APIs and authentication workflows using JWT.
- Designed responsive user interfaces using React.js and Tailwind CSS.
- Implemented CRUD operations and database management using MongoDB and Prisma ORM.
- Enhanced user experience through scalable architecture and optimized application performance.

GitHub: <https://github.com/fahaman/HelpHive>

Technical Event Management System Support

- Technologies: System Troubleshooting, IT Support, Technical Operations
- Managed technical operations and system coordination during NGO exhibitions and public events.
- Resolved 20+ technical issues during live exhibitions, ensuring uninterrupted event execution.
- Supported 500+ attendees through real-time technical troubleshooting and operational assistance.
- Assisted in infrastructure setup, software troubleshooting, and digital presentation management.
- Collaborated with teams to ensure smooth execution of technical workflows under time-sensitive conditions.
