About Me

Results-oriented Full Stack Developer with practical experience in designing, developing, and deploying modern web applications using the MERN Stack. Adept at creating scalable backend systems, responsive frontend interfaces, secure authentication mechanisms, and efficient database architectures. Strong analytical and problem-solving abilities complemented by a passion for continuous learning in cloud computing, AI, and emerging technologies. Seeking opportunities to contribute technical expertise, innovation, and dedication within a dynamic software engineering team while continuously growing as a developer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design, React Router

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Authorization, MVC Architecture

Databases: MongoDB, MySQL, Prisma ORM

Developer Tools: Git, GitHub, Postman, Firebase, Vite, VS Code, CI/CD

Core Skills: Full Stack Development, MERN Stack, Software Engineering, Database Design, API Integration, Performance Optimization, Agile Development, SDLC, Object-Oriented Programming, Data Structures, Problem Solving

Cloud & AI: Google Cloud Platform, Prompt Engineering, Generative AI, Large Language Models

PROFESSIONAL EXPERIENCE

Technical Operations Support (Part-Time)

Aug 2024 – Oct 2025

INF NGO

Karnataka, India

- Resolved 20+ software, hardware, and infrastructure issues during large-scale NGO exhibitions, ensuring uninterrupted technical operations and system reliability.
- Delivered real-time technical support to 500+ attendees by troubleshooting software, configuring systems, and maintaining event infrastructure.
- Collaborated with cross-functional teams to deploy technical solutions, streamline event workflows, and execute time-sensitive operations successfully.

EDUCATION

Bachelor of Computer Applications (BCA)

July 2023 – July 2026

Anjuman Institute of Management and Computer Application

Karnataka, India

Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

PROJECTS

LearnChart – AI-Powered Trading Education Platform

React.js | Node.js | Express.js | MongoDB | Prisma ORM

- Developed a scalable MERN Stack learning platform using React.js, Node.js, Express.js, MongoDB, and Prisma ORM.
- Implemented JWT Authentication, Role-Based Access Control (RBAC), RESTful APIs, and secure backend architecture.
- Optimized MongoDB queries, improving API response time by approximately 30% while supporting 100+ concurrent users.
- Designed responsive dashboards for course management, analytics, and progress tracking following modern software engineering practices.

HelpHive – Community Support Marketplace

React.js | Node.js | Express.js | MongoDB

- Built a scalable MERN marketplace connecting users with verified service providers through secure RESTful APIs.
- Developed responsive React.js interfaces using Tailwind CSS while implementing authentication, CRUD operations, and backend services.
- Enhanced application performance through database optimization, modular architecture, and efficient API integration.

CERTIFICATIONS

- Cohort 2.0 Web Devevelopment (Sheryians coding school)
- Google Cloud – Introduction to Generative AI
- Google Cloud – Introduction to Large Language Models
- Google Cloud – Responsible AI
- Google Cloud – Prompt Design in Vertex AI
- Git, GitHub & Markdown Crash Course (Udemy)
- Advanced Search Engine Optimization (Simplilearn)

LEADERSHIP & ACHIEVEMENTS

- Class Representative (3rd Year), coordinating communication between students and faculty
- Event Coordinator and College Fest Organizer, demonstrating leadership, planning, and teamwork
- Solved 200+ coding problems across competitive programming challenges
- Developed multiple Full Stack MERN applications using modern software engineering practices
- Google Cloud Certified in Generative AI, Responsible AI, Prompt Engineering, and Large Language Models
